

CLAASENS DESIGNS

The "original biltong slicer" since 1955.

The first hand biltong slicer was manufactured from wood and pieces of scrap metal. Once the idea was established, the slicer was manufactured from cast aluminium and the blade was designed to be in a spiral shape. The same blade shape is still in use today.

The original Claasens electric slicer came into existence in 1955. It was developed and patented by late Mr Willem Claasens senior.

The current company manufacture and market a range of food processing products to established South African and international markets.

The biltong processing products are well known for its uniqueness and quality, and were developed based on the original patent.

The business is the leader producer with the most comprehensive product range for biltong processing.

Hand Biltong Slicer

(#K110)

User Manual – Hand Biltong Slicer (HK110)

IMPORTANT USER INFORMATION

It is important that you read these instructions carefully before using the Hand Biltong Slicer.

FEATURES

INSTRUCTIONS FOR USE

- Screw the hand biltong slicer onto a suitable table top.
- Place the biltong at the edge of the blade and turn the handle for cutting.
- Remove the slices from time to time, to prevent build up at the inside of the slicer.

CLEANING

- Hand wash with soap and warm water.

STORAGE

- Store in a clean, dry place away from children.

TROUBLE SHOOTING

After prolonged use, the blade can be sharpened.

TECHNICAL DATA

- Original patent
- Fit onto table top
- Durable epoxy finish
- Cut 2mm slices
- Hardened steel blade (item code HKL1101)

- Packed weight: 3 kg
- Package dimensions: 345x220x200

HANDLE ASSEMBLY

As shown in the image above. Screw the bolt into the biltong slicer arm with the handle in place, and secure with the nut provided at the back.

WARRANTY

Under normal conditions of use, our products are warranted to be free of defects in both material and workmanship for a period of one year from date of purchase.

Electric motors, electrical and electronic components are covered by the specific supplier of the electrical components. Any defects or problems are subject to evaluation by the supplier.

This warranty does not apply to products that have been tampered with, damaged, improperly stored or installed, or subject to any other abuse. Normal wear and tear is excluded from the warranty.

In the event that any products are found to be defective, the manufacturer will repair or replace damaged equipment.

Requests for warranty reimbursement must be accompanied by satisfactory evidence that the damage occurred during the warranty period.

Please note that the warranty does not include transport costs.

These products are not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction by a person responsible for their safety.

Liability

The supplier does not accept liability for any injuries sustained during use of this range of products.
